Max Williamson assists private and public clients with environmental and specialty litigation, regulatory counseling, transactional and legislative issues. His experience spans project development, real estate, climate change, Clean Air Act, transportation planning, toxic tort, Clean Water Act and wetlands, OSHA, Superfund and brownfields programs, environmental insurance, EPCRA and spill reporting, hazardous materials transportation, recycling and corporate affiliate liability issues in the domestic and international contexts.

Max is a recognized authority and frequent speaker and author in the area of climate change. He advises a range of clients including trade associations, manufacturers, project developers and investors on emerging greenhouse gas regulation and market opportunities under state, regional and federal climate change and renewable energy initiatives, as well as under the federal Clean Air Act and other environmental laws. Max currently represents the Carbon Offset Providers Coalition, an association of companies that finance and develop greenhouse gas reduction projects to generate greenhouse gas offsets for the voluntary and compliance carbon markets. He also wrote one of the first template Voluntary Emissions Reduction Purchase Agreements (VERPA) used in the United States. He is integrally involved in the legislative process and has written significant climate-related legislative proposals now being considered by Congress. Max is also involved in the cutting-edge area of ecosystem credit markets, such as water quality trading and streambank restoration.

Max's transportation experience includes representing the Association of Metropolitan Planning Organizations (AMPO) and various transportation authorities. He also serves on the board of directors of the Alexandria Transit Company in Northern Virginia. He represented a coalition of national trade associations in the successful defense of multiple strategic litigation cases involving transportation planning in various urban areas, including a precedent-setting decision establishing the right of trade associations to intervene in environmental cases in *Utahns for Better Transportation v. Slater*, 295 F.3d 1111 (10th Cir. 2002).

Other notable successes include decisions of first impression under the Clean Water Act in *American Canoe Ass'n v. D.C. Water and Sewer Authority*, 306 F. Supp. 2d 30 (D.D.C. 2004), and addressing liability of corporate affiliates under the Superfund statute in *BP Amoco Chemical Co. v. Sun Oil Co.*, 316 F.

EDUCATION

JD, 1997, *magna cum laude*, Vermont Law School
Masters Environmental Law, 1997, *summa cum laude*, Vermont Law School

David M. "Max" Williamson

Supp. 2d 166 (D. Del. 2004). Max also counsels manufacturing firms, real estate developers and financial institutions on regulatory issues ranging from environmental permitting to real estate transactions and due diligence.

Max also has extensive experience in the area of environmental insurance and commercial insurance policies, such as environmental cost cap and pollution legal liability policies in brownfield redevelopment and contaminated property cleanups, environmental liability transfers, transactions involving environmental risks, use of insurance products in creation of ecosystem credits such as greenhouse gas reduction projects (carbon offsets) and carbon capture and sequestration (CCS) and traditional property damage and personal injury liability. He has litigated insurance and coverage claims in state and federal courts involving environmental contamination, toxic torts (such as lead-based paint) and chemical exposure, as well as negotiation of policies and coverage terms.

Max served as a law clerk to the Honorable Robert G. Flanders, Jr., of the Rhode Island Supreme Court, and clerked at the U.S. Department of Justice, Environment and Natural Resources Division Appellate Section. He is a licensed master of steam and sail vessels in the U.S. Merchant Marine.

REPRESENTATIVE EXPERIENCE

- Represents the carbon offset project development sector in the legislative arena on Capitol Hill and executive agencies such as the U.S. Environmental Protection Agency and U.S. Department of Agriculture.
- Legal counsel to national trade association on climate change issues affecting food processing industry.
- Represented a carbon market participant in administrative proceedings before the California Climate Action Reserve.
- Represents a major carbon registry with regard to legislative developments affecting carbon trading.
- Provides government affairs, legislative services and strategic advising to major carbon market participants.
- Provides transactional and project development legal support to greenhouse gas emissions reduction technology provider at various facilities.
- Provides corporate finance and environmental/carbon markets advice to an investment fund focused on urban sustainability strategies.
- Represents national trade association with regard to climate change policies affecting highway and transit transportation investment.
- Advises major paper products manufacturer regarding strategic planning for climate and energy policies at the federal and state levels.
- Served as lead counsel for a transportation and construction industry coalition in a series of lawsuits under the Clean Air Act and other federal statutes brought by environmental and local groups to stop highway and development projects in Atlanta, Salt Lake City, San Francisco, Sacramento, Baltimore and Washington, DC.

BA, 1987, Yale University

US District Court for the Eastern District of New York

David M. "Max" Williamson

- Helped a small real estate developer force one of the world's largest oil companies to clean up petroleum contamination from underground storage tanks (USTs) impacting a mixed-use residential/commercial development in the District of Columbia.
- Represented the largest municipal wastewater authority in the country with precedent-setting litigation establishing that environmental groups may not use the Clean Water Act (or its civil penalty and attorneys fee provisions) to enforce complaints about odor or aesthetics.
- Helped defeat multimillion-dollar indemnification and environmental claims under the federal CERCLA statute and Delaware state law alleging that a parent company was liable for environmental contamination of Delaware Bay caused by its former joint venture subsidiary.
- Has assisted financial institutions, private equity groups and public companies (both purchasers and targets) with environmental due diligence and disclosures involving mergers and acquisition and asset purchases.
- Planned and conducted environmental audits at manufacturing facilities throughout the United States, including development of operating procedures and compliance tools.
- Successfully defended a District of Columbia government agency in a Freedom of Information Act lawsuit in Washington, DC Superior Court, including winning a protective order and sanctions against opposing counsel.
- Guided a major manufacturing company through remediation and real estate transactions involving contaminated properties (brownfields) in several northeastern states. He has also advised the District of Columbia government in drafting regulations under its new Brownfields Redevelopment Act.
- Assisted clients with obtaining or modifying permits under the Clean Air Act, Clean Water Act, Underground Injection Control Program, UST regulations, zoning and planning board approval, and other regulatory programs.
