## Climate Change Vulnerability Assessments: Four Case Studies of Water Utility Practices

Posted on **September 3, 2010** by Paul M. Bohannon

This draft report presents a series of case studies describing the approaches currently being taken by four water utilities to assess their vulnerability to future climate change. The report is intended to illustrate the types of analyses, models and climate change information being developed and used by selected utilities that are leaders in climate adaptation to understand and respond to climate risk.

The public comment period and the external peer-review workshop, which will be scheduled at a later date and announced in the Federal Register, are separate processes that provide opportunities for all interested parties to comment on the document.
