TIR: Regulated Navigation Areas: Boom Deployment Strategy Testing, Great Bay, NH (Federal Register Publication)

Posted on **September 3, 2010** by Paul M. Bohannon

The Coast Guard is temporarily establishing a regulated navigation area (RNA) in navigable waters near Great Bay, New Hampshire. This temporary regulation is in effect while the New Hampshire Department of Environmental Services (NHDES) conducts boom deployments to test the effectiveness of oil spill response strategies, and is necessary to ensure the safety of exercise participants and the maritime public from hazards associated with the boom deployment exercise. While the RNA is in effect, all vessels must transit at bare steerageway and comply with directions from the Captain of the Port.
