

## Technology

### **Knowledge Management and Global Access**

We communicate within our firm, with clients and worldwide using such resources as:

- Client extranets
- Industry standard MS operating systems and Exchange environments
- Blackberrys are provided for all attorneys
- Video conferencing supports video bridging, direct IP and ISDN connections
- Technologically sophisticated laptops
- Citrix access across the globe
- Two separate and redundant high speed networks connecting our domestic offices
- Redundant architecture ensures high availability on critical systems: Clustered Exchange environments, redundant data center, MessageOne's EMS as a third layer of email redundancy with worldwide access, multiple ISPs for continuous internet access
- Interwoven Document Management System for storing/retrieval and searching client documents
- Rich research and application capabilities include Westlaw, Lexis, ContactNet, WestKM, FileSurf, Deal Rooms
- Litigation support includes state-of-the-art FileControl and support for clients using Summation, Concordance and additional systems and outside services

### **Information Technology Leadership and Support**

Our IT leadership team includes veterans from the areas of technology, information systems and law, and they participate as formal advisors to key legal vendors. Our tech personnel have taken active, thought-leadership roles in the International Legal Technology Association.
