The company offers a comprehensive line of products for various industries, including aerospace, automotive, energy, and marine. Norriseal's commitment to innovation and quality has helped it maintain a strong presence in the market.
Texas Emerges as One of America’s “Cyberstates”

Texas’s economy is rapidly growing due to its increase in the development of advanced technologies, making the state an economic frontier in America. Texas’s technology industry ranked among the top five “Cyberstates” in 2013 and continues to grow today.

Austinite-based Tex3, a technology startup funded by the Texas Emerging Technology Fund, a $400 million state fund, has been successful in the emerging technology field. The company was founded in 2007 by a team of industry pioneers, who have turned their patented 3D motion sensing technology into mainstream commercialized products across a variety of industries including video gaming, military and health sciences. As a result, Tex3 is an early-stage up-start with unlimited growth potential, it is an open-to-talks with international investors and potential partners.

Stable Service in an Ever-Changing Industry

The Aldridge Company, a Fortune 500 company to start-ups, Texas’s technology leadership and more rapidly expanding. Like many industries in Texas, rapid growth is expected due to an increase in 500 companies estimated 300. The company is directed by its founder president, has been supporting the local company has recently made strategic alliances with its clients and partners for many years. It is a role they have taken with Harfords Surface Technologies. As Mr. Falzon emphasized, “It’s the relationships and the problem solving that we have been successful in the years that have enabled these new opportunities.”

Building A Global Gateway For China

Enbridge Energy

Since 2013, FW Gartner has been entering into long-term relationships with suppliers, key service providers, their clients, and other critical service providers. Mike Falzon, a fourth-generation FW Gartner president found it odd to think of all the technologies that allow us to build better, more efficient services. “It is just the ownership of J&J FW Gartner,” he said. “It is the company culture as a whole.”

Long gone are the days when IT was a separate concern from the business, it is now a natural part of the workforce and receptiveness is occurring across every industry. As Axelo is currently hiring for its rapidly growing Bakken formation in Canada and the United States. Currently, Enbridge is expanding in pipeline regions to support its growing network in the natural gas transmission and midstream businesses, particularly in the United States. For example, the company transports about half of the domestic natural gas production in the Gulf of Mexico. Enbridge is also expanding its renewable and green energy technologies such as wind and solar energy, hybrid fuel cells and carbon dioxide sequestration.

Texas’s energy market.

Enbridge is providing transportation solutions for the Canadian oil sands, which of course have been backed by Canadian investors. Our Northern Gander project will help to facilitate the energy independence of Canada and the western Canadian energy producers have access to markets and chinese markets.” Mr. Falzon explained. Enbridge is encouraged by a stronger and more supportive market of Canadian companies worldwide and hopes to further collaborate with Chinese companies on energy transportation infrastructure opportunities.

Since 2013, FW Gartner has been entering into long-term relationships with suppliers, key service providers, their clients, and other critical service providers. Mike Falzon, a fourth-generation FW Gartner president found it odd to think of all the technologies that allow us to build better, more efficient services. “It is just the ownership of J&J FW Gartner,” he said. “It is the company culture as a whole.”
Building Relations Between China And Houston

An Oil Industry Legacy And Leader

Cameron

Robust state economy and high standards of living enjoyed at low cost of living

不久前，美国商务部（美国商务部）和Andrews Kurth LLC共同举办了以“如何把握中国未来”为主题的会议。会上，双方就中国未来的发展趋势、经济环境以及相关政策进行了深入的讨论。美国商务代表通过具体的案例和数据，向与会者展示了中国市场的重要性和潜力。Andrews Kurth的律师也分享了他们在与中国企业合作的经验，以及如何为客户提供有效的法律和商业建议。与会者们对这次会议表达了高度的评价，并期待未来能有更多类似的交流机会。更多相关信息，请访问www.andrewskurth.com。
Since its founding in 1841, National Oilwell Varco has set in motion projects that have had a lasting impact on the oil and gas industry worldwide—and it continues to create NOV, and since then, it has been a leader in the manufacturing and engineering sector. In 1990, the company began focusing on offshore drilling and became known primarily as a drilling equipment supplier. Today, NOV is a global oilfield service company that provides a wide range of products and services to the oil and gas industry worldwide. NOV’s surge began in 2000, when the company began focusing on offshore drilling and became known primarily as a drilling equipment supplier. Today, NOV is a global oilfield service company that provides a wide range of products and services to the oil and gas industry worldwide.

Evolving With China's Oilfield Industry

National Oilwell Varco

Mark G. Miller, Chief Executive Officer and President of National Oilwell Varco

As the Chinese oilfield evolves, a company that can provide many of the skills NOV is so well known for will be needed. While NOV has enjoyed plenty of success in China over the past few decades, Miller says that China is just beginning to reach the advanced stage of development that NOV has already entered. In the years to come, China will need a company that can provide the skills and experience that NOV has developed over the past century and a half. NOV will be in a position to partner with Chinese companies to help them achieve success in the oil and gas industry in China.

The company's surge began in 2000, when the company began focusing on offshore drilling and became known primarily as a drilling equipment supplier. Today, NOV is a global oilfield service company that provides a wide range of products and services to the oil and gas industry worldwide.
